

Change the game

with NetDataVault Cloud Factory
powered by HP CloudSystem

Often cited as the most path-breaking technology paradigm today, Cloud Computing is rewriting the rules of the business when it comes to cost savings, scalability and availability of dynamic computing resources, software platforms and applications. It enables businesses to switch from CapEx to OpEx, and benefit from easier maintenance – available from Cloud providers like **NetDataVault** using industry leading **Cloud Solutions from HP**.

NetDataVault an **NGBPS Ltd.** initiative is a leading provider of intelligent CapEx free, revenue generating IT infrastructure solutions for business automation, catering to small and mid-sized enterprises, ISVs, e-commerce companies and large enterprises. NetDataVault's rich portfolio of solutions transform the ICT infrastructure into smart cloud based solutions, that can rapidly and efficiently deploy value added services for both the enterprise and its stakeholders.

NetDataVault's business platform on

NetDataVault's enterprise-grade Cloud Factory not only reduces the CapEx but also minimizes time to deploy. The underlying technology represents a breakthrough innovation that combines HP CloudSystem Matrix along with Cloud Matrix Operating Environment for Cloud Management, best-in-class Fiber Connect SAN Storage, Virtual Connect Networking, and HP Insight Manager (HP SIM) software, into a single, ready-to-deploy infrastructure.

NetDataVault's delivery model makes service metering, usage tracking and reporting transparent; bringing consumers together in an environment where they can measure and manage their business value with each other. All this is available through a self-service provisioning interface from the website www.netdatavault.com.

The NetDataVault Cloud Factory provides a consistent and integrated security management framework that can be configured to satisfy security policies, utilizing security mechanisms in individual components and security services across the integrated solution. This ensures that all customer concerns with respect to security and privacy are taken care of, for complete peace of mind.

NetDataVault CloudSystem difference

Meet your dynamic business needs

NetDataVault's proprietary infrastructure as a service (IaaS) solution for private and hybrid cloud deployments is based on proven, market-leading Converged Infrastructure and Cloud Service Automation. The CloudSystem integrates servers, storage,

networking, security, and management to automate the infrastructure-to-application lifecycle for hybrid service delivery management. The result is a complete cloud solution that lets your enterprise gain agility and speed, and allows you to drive top-line growth.

CloudSystem highlights

- Provision infrastructure and applications in minutes for physical and virtual deployment
- Reduce Total Cost of Ownership (TCO) up to 56% with built-in infrastructure life-cycle management
- Integrated by design; includes support of heterogeneous environments

Deploy cloud based applications faster

HP Cloud Maps are prepackaged, optimized, and tested templates for use with the CloudSystem and related software to automate the deployment of applications in the cloud. Leveraging the deep partnerships HP has with key independent software vendors (ISVs), its expertise in cloud infrastructure and software, and the knowledge and intellectual property developed in the course of real world HP customer deployments, HP Cloud Maps enable:

- Repeatable, proven deployment that reduces risk and assures improved service levels
- Optimized performance, with built-in disaster tolerance, capacity planning, compliance, and life cycle management
- Savings of up to 200 staff-hours in design, development, and deployment for each application environment
- Fast assembly of application service catalogs, with a portfolio of CloudMaps for over 100 leading business applications
- Push-button simple delivery of new applications, often in less than an hour

NetDataVault Cloud Factory advantages

Vendor agnostic: Concerns with respect to over-dependence on vendors and vendor lock-in are a thing of the past. You have the complete freedom of moving workloads as per your needs and convenience.

Value for money: Pay for what you use.

Secure investments: Integration with existing systems (hardware and software) is also not something customers need to worry about, NetDataVault's team of trusted experts, with years of experience in the IT domain understand the needs of various industry segments and will support you at every step.

Access to latest technology: Constant investment in feature enhancements and maturity of its ANSI/ TIA-942, tier-3 compliant infrastructure, multi-environment operating system, pay per use and hardware vendor neutral policies have made NetDataVault the clear choice instilling trust and recognition among enterprises today.

Skills, scalability and savings: Skilled to support any operating environment, be it Microsoft or Linux the NetDataVault team supports its customers with wider integration, scope of applications, scale and maturity of solutions thus bringing savings on license costs, etc.

High availability: NetDataVault offers industry leading SLAs which have been designed to meet the requirements of organizations like

yours and wherever required these can be customized to meet your expectations completely.

Highly secure: NetDataVault is uniquely positioned to deliver customized IT services & solutions ranging from a simple server requirement to mailboxes, SharePoint, ERP, CRM etc., on Windows or Linux platforms in a completely secured highly available environment.

Flexible payment structures: Request service through the intelligent online self service customer portal, offering various payment structures ranging from credit card, RTGS transfers, cheque payments etc., for trouble free consumption.

NetDataVault, powered by HP Cloud System Technology, is going to change the way customers do business. Achieve more with less, save energy and space; be liberal with ideas and conservative with cash!
